

AS9100 Rev D

Module 1 - Training on the “Principles of a Quality Management System (QMS)”

This training will educate all employees on the key characteristics, advantages, and impact of the AS9100C Quality Management System (QMS). Upon completion of the training, each employee will have a comprehensive understanding of quality and continuous improvement. And most importantly they will understand how all of their actions contribute (either positively or negatively) to the bottom line of the company.

- Why do we need AS9100?
- How AS9101D fits in with AS9100C?
- What is the Process Approach?
- The 8 Quality Management Principles
- How the 5 major Clauses of AS9100 work as a process
- Why having a Vision, Mission and Quality Policy important?
- Using the Plan-Do-Check-Act (PDCA) process to establish sustainable change and improvement
- Preparing for ISO registration
