

Website Development Training

Module 4: 16 Hours

TRAINING DESCRIPTION

Website Development Training Module 4 is designed to build upon the skills and knowledge attained through Website Development Modules 1, 2, and 3. Instructors will guide participants in the development and implementation of knowledge and skills to address the website needs identified. This training will include interactive conferencing and is geared for all levels of the company.

TRAINING OBJECTIVE

This training will focus on the final steps of going live with your new website by utilizing best practices such as Quality Assurance Testing, Redirects and Mobile Optimization.

SKILL ATTAINMENT

Participants will be trained in a method for development of effective website design, including Mobile Optimization, Quality Assurance Testing, and Redirect best practices.

TRAINING CONTENT

Training provided will include:

- Training in quality assurance for the site using multiple rounds of testing – monitoring site “health” and functionality
- Training in Mobile Optimization to ensure that the site translates to mobile devices, tablets and desktop including that mobile load speed is equivalent to desktop speed
- Training in Redirects – to ensure that old website links forward to appropriate page son the new site
